Ms. Alexis Strauss
Acting Regional Administrator
Region 9
U.S. Environmental Protection Agency
75 Hawthorne Street
San Francisco, California 94105

Dear Ms. Strauss:

The California Air Resources Board (CARB) is submitting to the U.S. Environmental Protection Agency (U.S. EPA) the *Reasonably Available Control Technology State Implementation Plan Analysis* (RACT SIP) prepared by the Yolo-Solano Air Quality Management District (District) as a revision to the California State Implementation Plan (SIP).

The District recently adopted the RACT SIP for the 75 parts per billion 8-hour ozone national ambient air quality standard. The information contained in the RACT SIP demonstrates that the District appropriately reviewed their rules in the context of RACT and comprises an analysis sufficient to satisfy the RACT SIP requirements.

RACT SIP analyses are required for specific stationary sources for which U.S. EPA has published Control Technique Guidelines (CTG) and for major non-CTG stationary sources. Following U.S. EPA requirements, the District reviewed its existing stationary source rules to determine if those rules continue to meet RACT requirements. The RACT SIP identifies one RACT deficiency for which the District has committed to revising the applicable rule.

This SIP submittal consists of one hard copy and one compact disc with exact duplicates of the following enclosures:

1. CARB Executive Order S-17-017 adopting the RACT SIP as a revision to the California SIP.
2. The RACT SIP and supporting documentation.

The enclosed submittal includes the complete package received by CARB from the District. In addition to the RACT SIP, the submittal includes evidence of public notice, certification of public hearing, and evidence of adoption. CARB staff reviewed the submittal for technical adequacy and completeness as indicated on the SIP Completeness Checklist included with the District submittal package.

Ms. Alexis Strauss
